

INTRODUCTION TO ALL-HAZARD INCIDENT MANAGEMENT COURSES

In today's complex operational environment, the ability to manage incidents systematically is non-negotiable. At NCC-Group, we empower professionals to lead with confidence through our globally recognised **Incident Command System (ICS)** e-Learning programmes.

ICS is the prevailing **international standard for command, control, and coordination** during any hazard or emergency. Mastering this systematic approach ensures clear communication, accountability, and maximum efficiency when it matters most.

Current e-learning courses on offer:

• **IS-0700: An Introduction to NIMS**

- **Focus:** Learn how NIMS coordinates all responders, including Incident Command Systems (ICS), Emergency Operations Centres (EOC), and Multiagency Coordination Groups (MAC).
- **Note:** This course is a pre-requisite for IS-0100.

• **IS-0100: An Introduction to ICS**

- **Focus:** Designed for efficient operation during initial response. Covers the chain of command, common terminology, and basic structure used globally.
- **Note:** This course is a pre-requisite for IS-0200.

• **IS-0200: Basic ICS for Initial Response**

- **Focus:** Building on IS-100, this course covers leadership roles, briefings, and managing resources in expanding incidents.

Who should attend?

Professionals involved in emergency response, safety, and event management across all sectors:

- **Government & Municipalities:** Disaster Management officials, Metro Police, and Traffic Services.
- **Emergency Services:** Fire & Rescue Services, EMS personnel, and SAPS members.
- **Private Sector:** Health & Safety Officers, Security Managers, and Event Organisers.
- **Specialised Agencies:** Forestry, Conservation Officers, and Community Safety Forums.

How to Register:

Create your profile on **our portal** for a once-off registration fee of R395. This grants you **immediate access to IS-700, IS-100, and IS-200**, plus all future free content.

Why Choose NCC-Group?

- **Global Standard, Local Context:** We combine international FEMA standards with practical application for the South African environment.
- **Standardised Approach:** Ensure your team speaks the same language as Provincial and National Disaster Management agencies.
- **Flexible e-Learning:** Complete your training at your own pace, anytime, anywhere - perfect for shifting schedules.
- **Advanced Contact Training:** Beyond the portal, we offer specialist in-person courses including IS-300, IMT Position Specific courses, and Scenario-based IMT simulations.
